**Subject:** RE: Portland Harbor - Call to Discuss Revised FS

Kristine-

Per your request the following is a list of technical issues we want to discuss with you and your team during tomorrow's conference call. Please note that this is just a preliminary list of technical issues for which the LWG is seeking clarification from EPA (e.g., ask questions to further understand EPA's information, including asking where the supporting information may be found in the revised FS, and to seek resolution of what appear to be some conflicting statements). As such, this list does not represent our list of "significant issues" with EPA's revised FS. Per our agreed-upon process the LWG's list of significant issues will be due 21 calendar days after receipt of the revised draft Section 4. The LWG may be able to identify some of those significant issues prior to our August 27 conference call, and hence add some of them to the agenda for that call, but we will not know if that is possible until we conduct our initial review of Section 4.

- Status of EPA revisions based on mapping issue.
- Expansion of the Site Area downstream of RM 1.8.
- Distinctions between PTW, PTW not reliably contained, and NAPL.
- Conflicting or confusing quantities.
- Construction durations.
- Alternative screening section.
- Where did the TPAH PRG of 970 ppb come from?
- Capping model used is outdated and should be updated.
- Why did EPA pick the Roosevelt Landfill in Washington State as an example disposal site?
- Volume estimates, cost estimates, need clarification on where to find supporting information.

Thanks, Jim.

Hi Kristine,

Carl and Jim are working on a short list of topics for Thursday's call. We will get this list to you by noon tomorrow.

Thank you,
